Thomas Bush
Software Engineer

Highly motivated and self-taught Software Engineer with over 8 years commercial experience, who takes genuine pride in writing clean, concise and fully tested code. My career began as a receptionist in 2014, during this time I taught myself the fundamentals of web development. I have since progressed into the Software Engineer I am today, this progression is testament to my enthusiasm to learn and improve wherever possible. I've also benefited from working with countless colleagues and friends along the way who were generously willing to impart tonnes of wisdom. This has left a real impression on me, I still have much to learn in an ever changing environment but I still try to help and mentor others wherever possible - as I know first hand the palpable value of this.

Experience

Blink
Software Engineer

Working on the Blink frontline workers app. Built using React & Redux this application offers a wide variety of really awesome features, including: Real time chat, feed posts and very useful third party integrations.

February 2021 - September 2022

Now TV
Software Engineer

Producing fully tested (unit, functional, regression) new features. Keen focus on code review, I was in the top 20 reviewers across the entirety of Sky. Bug fixes across multiple devices.

March 2019 - February 2021

Brilliant Basics
Software Engineer

Worked in tandem with a number of offshore teams on a variety of greenfield projects. Played a key role in architecting and building a React Native application. Produced fully accessible angular component library.

March 2019 - February 2021

KHWS
Frontend Developer

Produced HTML emails & animated banners. Built a number of bespoke microsites for various blue chip clients. Maintained existing large scale applications.

August 2014 - April 2018

KHWS
Receptionist

During this time I was inspired by the work of the front end team and decided to use my free time to teach myself the fundamentals of web developmemt.

January 2014 - August 2014
